Outdoor Series rack cabinets are assembled packaged & delivered

ACCESS CONTROL SYSTEMS

The Racksis® rack cabinet and accessories systems supply your projects Access Control Systems besides cabinets and accessories. Thanks to well-known quality proven manufacturers to corporate on access controlling systems where is generally used to control and protect unauthorized access to the network, data centre and control rooms.

BLW-211PI, BLW-211MI, BLW-212PO, BLW-212MO

The BLW-211 / BLW-212 Access Control System is a standalone structure applicable for Wiegand reader too. It supports 2000 users allocated by 4 digit pin independently.

Ps: There is a ring button at BLW-212MO and BLW-212PO models.

TECHNICAL SPECIFICATIONS

Nominal working voltage	DC 12V±10%
User recognition capacity	2000 Users
Nominal Current	<60mA
Closed Circuit	25±5 mA
Output Current for Latching	Max 3A
Output Current for Alarm	Max 20A
Operating Temperature	-45 °C~60 °C
Humidity	10%- 90% RH
IP Class	IP68
The adjustable time interval for door relay	0 -99 sn

THE RFID CARD READER

TECHNICAL SPECIFICATIONS

Operating Voltage	12V DC
Operating Current	<200mA
Relay Contact values	Max 1A & 30V DC
Reading Distance	5 ~ 10 cm
Operating temperature	- 20°C ~ +60°C
User recognition capacity	1000 Users (1000 Cards)
Dimension	154x46x20 mm

The RFID card reader is a standalone structured card reader which triggers the magnetic latching system to access control.

BLW-222CFP

The BLW-222CFP System provides you the Fingerprint + Proximity card reading and password admittance in a single body.

FEATURES

- Access control system 3 functions in one device (fingerprint + Proximity card reading and password control)
- Analog keypad, voice menu
- High-performance sensing system by the ARM9 processor
- Controlling ability by triggering off turnstile, barrier, and electronic locking System
- Allowing Emergency Exit in case of Alarm
- Alarming at sabotage and violation
- Enforcing bell to ring.

TECHNICAL SPECIFICATIONS

Working System	Fingerprint + Proximity card reading + password control
Fingerprint recognition capacity	1000 Persons
Proximity Card recognition capacity	1000 Persons
Password recognition capacity	1000 Persons
Log Capacity	50.000 Event
Voice & Menu Language	Turkish, English
Connection Protocol	USB + Wiegand
Output relay	Triggering to Turnstile, Door, and Barrier.
Ring types	Personalize
Sabotage Alarm	OK
Door Sensor option	OK
Processor	32 bit CPU
A version of fingerprint recognition	SmackFinger v3.0 CEG 931 Sensor
The fingerprint verification period	Less than 1.0sec
Immediate fingerprint viewing	No
Referans scanning resolution	600 DPI
Faulty Scanning rate	0.00001 / 0.1 (%)
Operating temperature	-45°C ~ +60°C
Operating Humidity	20% ~ 80%

BLW-221CP-R

The Bullwark face recognition system combined 3 functions as one body to secure access controlling; face recognition + proximity RFID card reading + password admittance system.

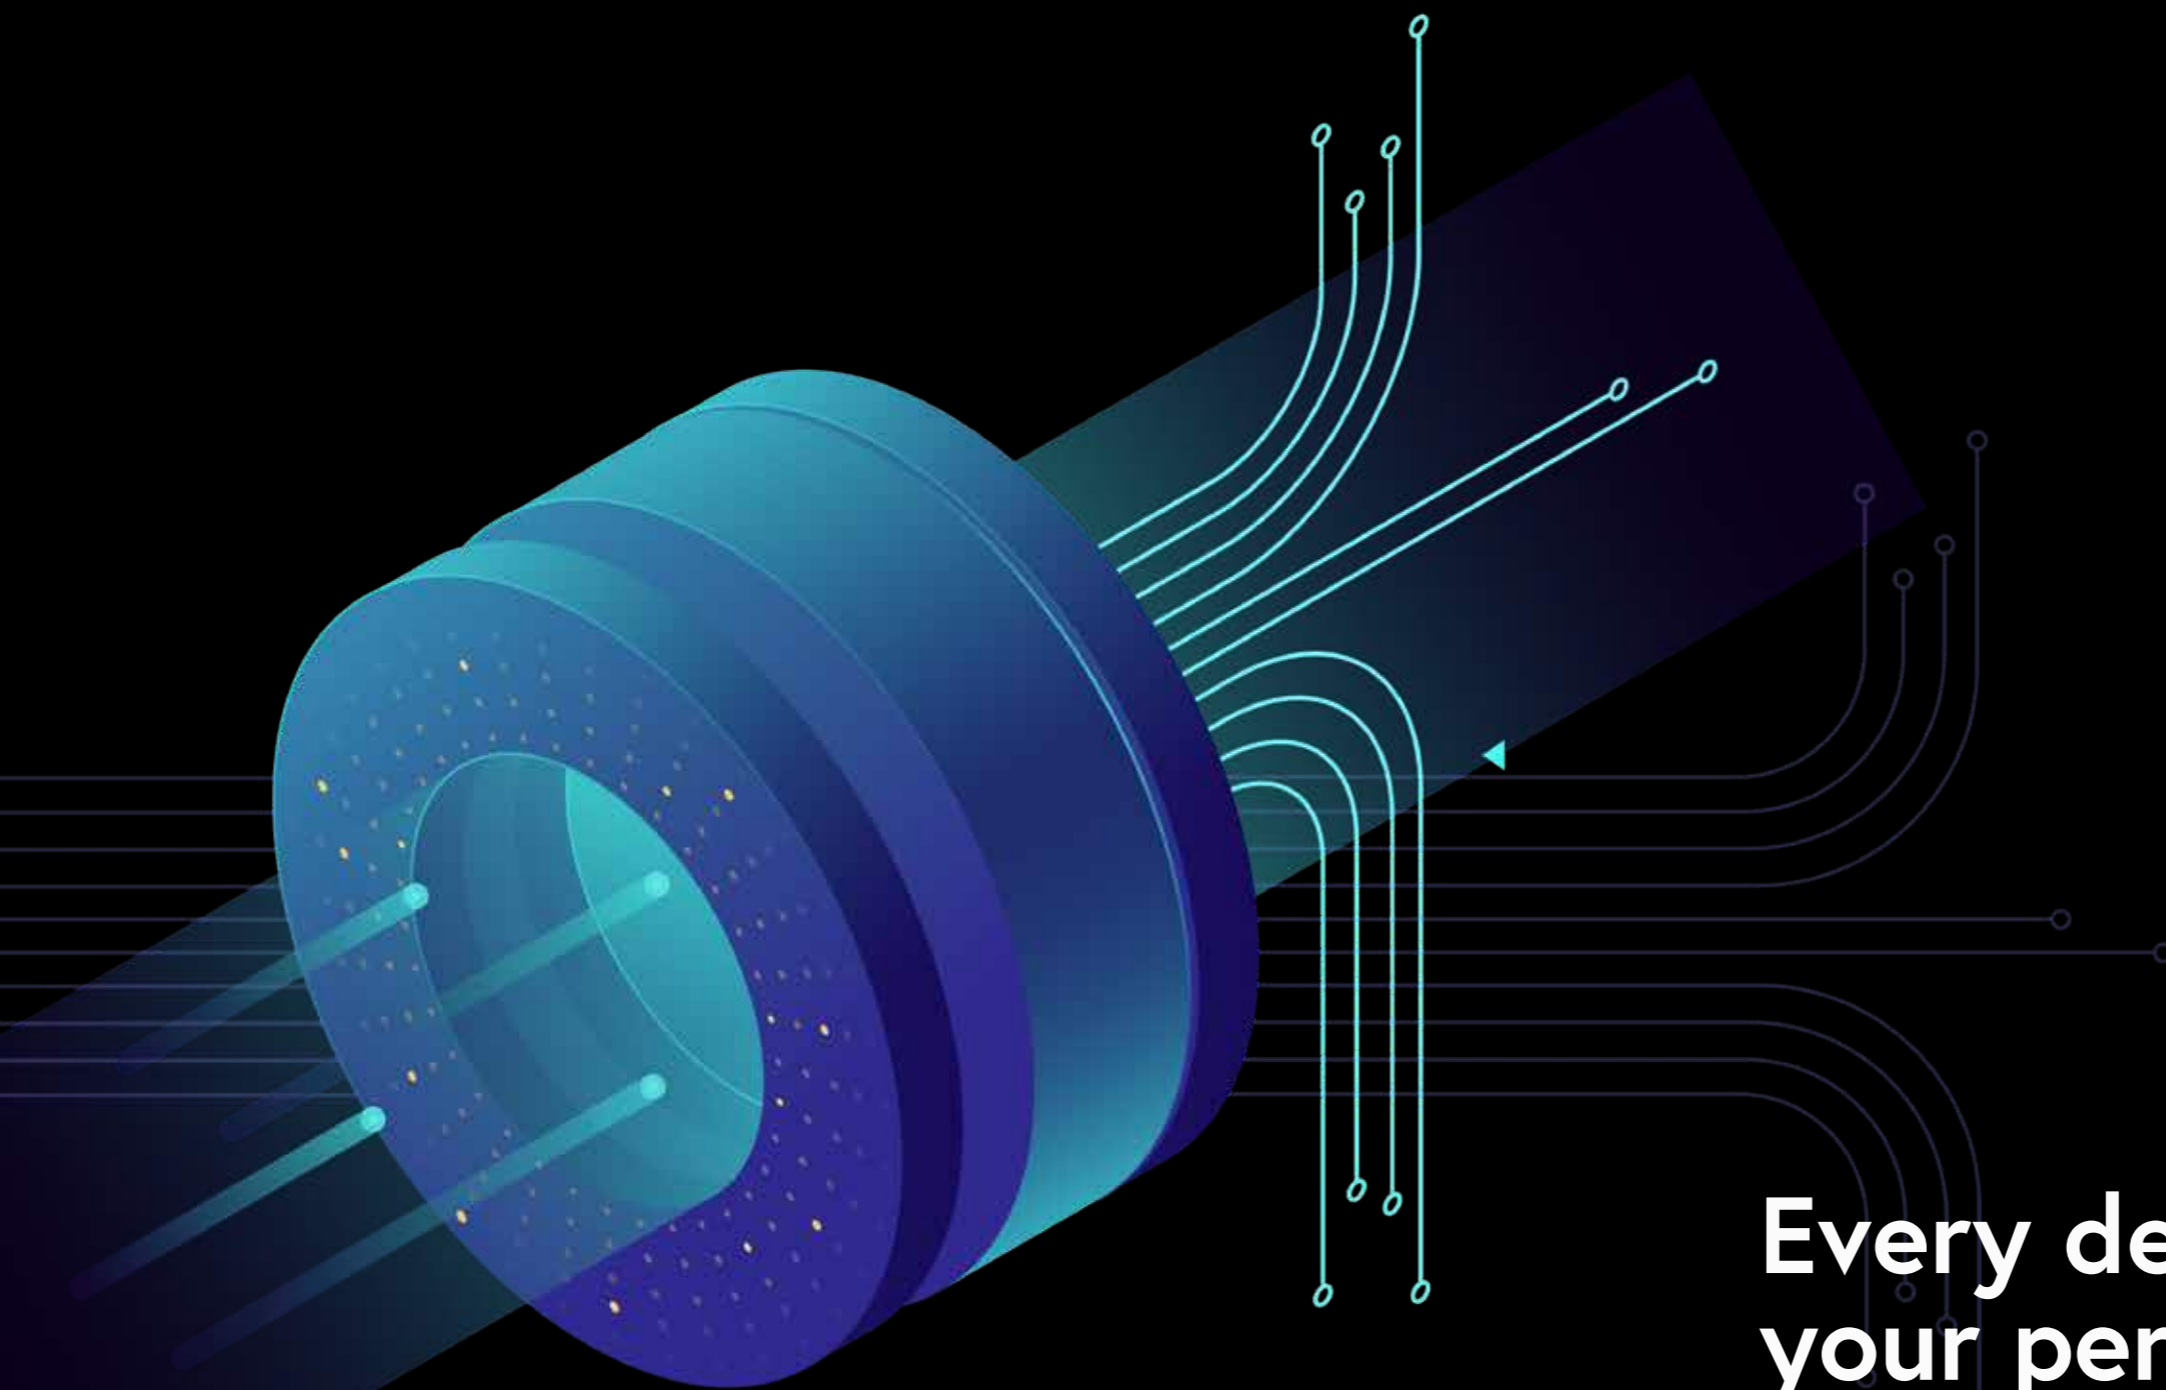

High-performance face recognition equipped with high-resolution cam, unaffected recognition from goggles, beard, and hairstyle e.g.

High-performance sensing system by an ARM9 processor
Controlling ability by triggering off turnstile, barrier, and electronic locking system
Allowing Emergency Exit in case of Alarm
Alarming at sabotage and violation
Enforcing bell to ring.
Wiegand connection

TECHNICAL SPECIFICATIONS

Operating System	Face Recognition + Proximity RFID Card Reading + Password controlling
Face Recognition capacity	500 Person
Proximity RFID Card recognition capacity	1000 Person
Password Controlling Capacity	1000 Person
Voice & Manu Language	Turkish, English
Connection Protocole	USB + Wiegand
Keypad	Analog Keypad
Trigging out Relay	Turnstile, door & barriers.
Personalized Ring Voice	OK
Sabotage Alarm	OK
Processor	USA Atmel 32 Bit ARM9
OS	Linux (v3.6.5)
Face recognition Algoritm Version	SmackFace (v2.2)
Faulty Scanning rate	0.00001 / 0.1 (%)
Operating temperature	-45°C ~ +60°C
Operating Humidity	20% ~ 80%
